We are working directly with FEMA and USDA. Donnie and Dean had a call with other CEOs yesterday that generated this latest request. NAMI will likely send out request. For Tyson Matt Mika has been asked to coordinate gathering the info through procurement.

Didn't know if there was a coordinated response from Tyson working with NAMI? We received two different requests- one for beef and one for pork.

Subject: Meat and Poultry COVID-19 PPE Needs Form
Importance: High

Good morning,

Following up from earlier, USDA continues to work within the federal family to address the Personal Protection Equipment (PPE) needs in the meat and poultry supply chain. The **attached Excel sheet details the sector specific information we are working to update** – in particular, we would need information on the PPE your company uses that would also be used by the medical or first responder community, for example, N95 face masks, or surgical face masks or gloves, etc. This request for information should be limited only to **unfulfilled** PPE needs required to maintain operational continuity over the next 60 days.

Your company's participation in providing this information is completely voluntary. In addition to USDA's use, the information provided will be shared with FEMA and the Supply Chain Stabilization Taskforce to better inform their understanding of

supply needs in the meat and poultry industry.

Please note that USDA does *not* have access to critical equipment or supplies, and collection of this information does not guarantee that the equipment will be available or provided.

If you choose to participate in providing this information, **please send the completed spreadsheet by email to foodsupplychain@usda.gov with the subject line “_____ Critical PPE Needs” by COB Wednesday, April 15.** If additional time is needed to complete this request, please provide the additional time frame needed.

Please call/email if we can answer any questions about this request.

Best,
Ashley
